Our Social Footprints

FROM THE LEADER

Hello dear children! Summer break is finally here, and it's the perfect time to relax and have fun. Here are some ideas to make your summer both enjoyable and memorable. Learning something new can make your summer exciting. So, try picking up a new language, conducting simple science experiments, or learning to cook by helping in the kitchen. Stay active by playing sports like cricket, badminton, or football, or try cycling around your neighbourhood and practicing yoga to stay relaxed. If the weather allows, spend time in nature by going for walks in parks and observing wildlife, or enjoy stargazing and learning about constellations. Discover a new hobby, like painting, drawing, or playing an instrument such as the guitar or keyboard. Gardening can also be rewarding as you watch your plants grow. Dive into the world of books with series like "Harry Potter," "Percy Jackson," or "Amar Chitra Katha. Helping others can definitely be fulfilling, so consider volunteering for local clean-up drives or helping younger kids with their studies. Don't forget to spend quality time with your family by playing board games and sharing stories. Set small, achievable goals for yourself and balance fun activities with learning new things. Make sure to relax, meditate, and get enough sleep. Enjoy your summer and come back to school with amazing stories to share!

Warm
regards,
Anshu
Sharma

CELEBRATION TIME

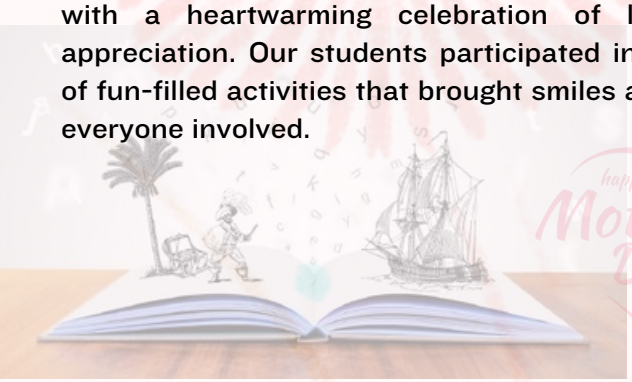

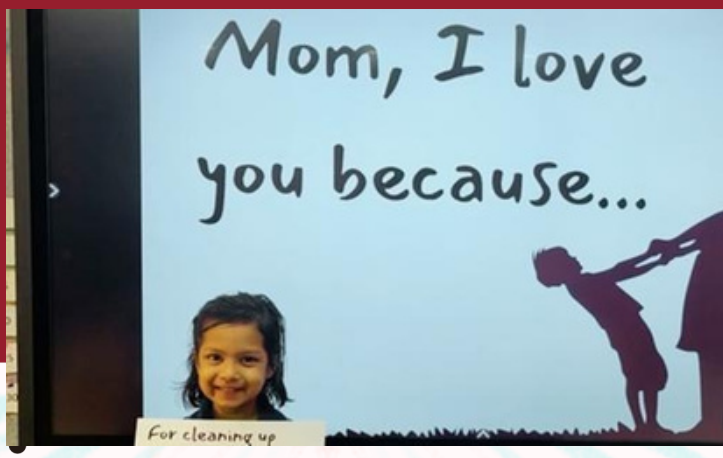

WORLD ART DAY

On World Art Day, with a theme echoing Earth Day, students engaged in a captivating leaf impression activity. They delicately pressed leaves onto paper, leaving behind intricate imprints, and infused them with vibrant watercolors, merging artistic expression with nature's beauty. Through this creative endeavor, participants celebrated the interconnectedness of arts and our planet, honoring the essence of Earth Day while nurturing their artistic spirit.

MOTHER'S DAY

This Mother's Day, Khaitan World School was alive with a heartwarming celebration of love and appreciation. Our students participated in a series of fun-filled activities that brought smiles and joy to everyone involved.

HAPPY INTERNATIONAL DANCE DAY!

KWS celebrated the rhythm and movement that dance brings into our lives. At our school, dance is more than an art form—it's a vibrant expression of creativity and a path to a healthier lifestyle.

FUN FOUNDATION

LITTLE CHEFS IN ACTION

Our nursery students had a blast engaging in no-flame cooking activities! It was incredible to watch our little chefs in action as they created delightful desserts using bread, muffins, and colorful gems. The joy and creativity they displayed made the experience truly magical. Yummy treats and big smiles all around!

WORLD LAUGHTER DAY

Laughter echoed through the classrooms as we celebrated World Laughter Day in true KWS style! Our students engaged in read-alouds, funny storytelling sessions, and created smiley emojis—activities that brought out bright smiles and hearty laughs. It was a heartfelt day filled with joy and connection.

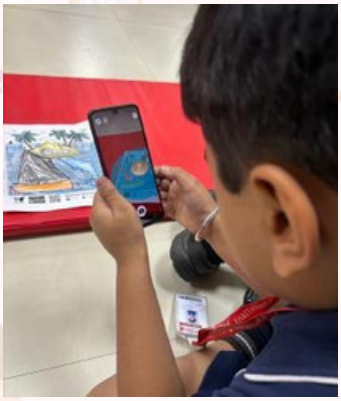

JOY PREPARATORY

Love for Plants

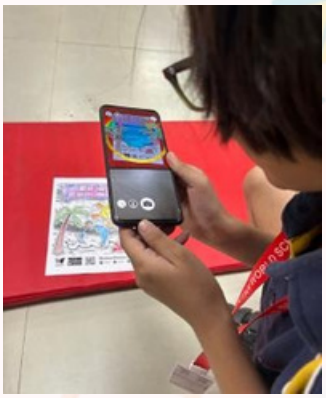

Students of Grade IV, embarked on an exciting journey into the world of plants with their new topic, Photosynthesis. Through engaging activities and interactive lessons, they learned how plants make their food using sunlight, water, and carbon dioxide. This approach made learning more interactive and fun.

National Tech Day

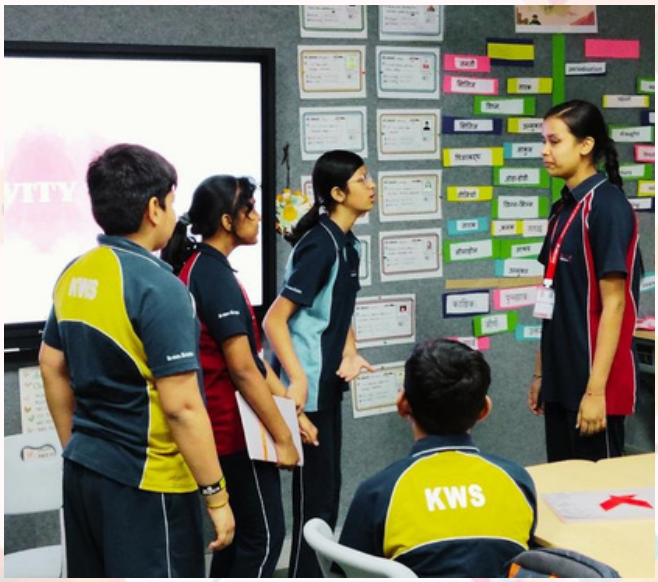

Transforming Art with Augmented Reality on National Technology Day! Our bright young students of 3 experienced the magic of Augmented Reality (AR) with the Quiver app! During this captivating activity, they colored special AR-compatible pages. With a little help from their teachers, they scanned their artworks using the app and watched in awe as their drawings sprang to life in vibrant 3D animations!

MEDLEY WITH MIDDLE

DREAMS IN ACTION!

Grade 7 students showcased their understanding of social inequality through a thought-provoking skit. Through their expressive acting, the students effectively conveyed their thoughts and ideas on this important topic.

TIME TO JAM

Students from Grades 6, 7, and 8 recently showcased their exceptional oratory and critical thinking skills in an exhilarating Inter-House JAM (Just A Minute) competition. Participants captivated the audience by speaking on diverse topics for a full minute without hesitation, repetition, or deviation.

WHAT'S THE BUZZ?

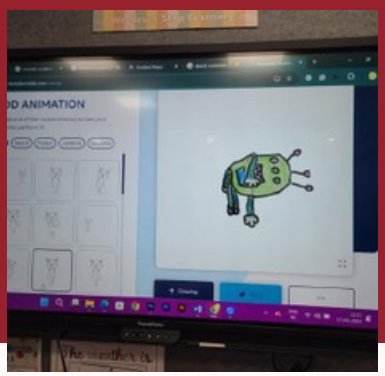

ART OF PHOTOGRAPHY

Our Photography Club students are taking their skills to new heights! From mastering camera grips to exploring various photography techniques and learning the rule of thirds, our budding photographers are seeing the world through a new lens.

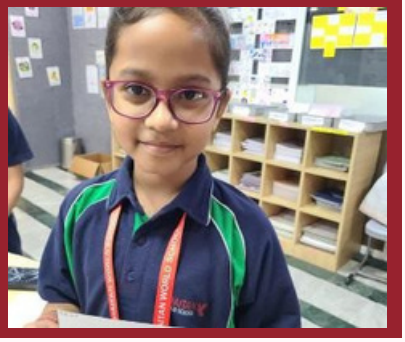

CREATIVE MINDS AT WORK!

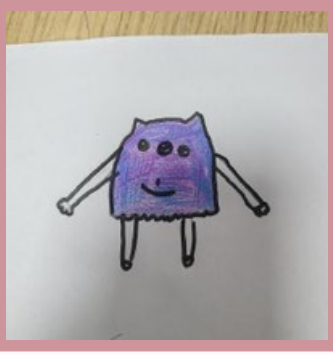

Our Grade 3 students embarked on a fantastic journey where art meets technology. They began by drawing their unique versions of aliens and then brought them to life through animation. Witnessing their imaginations soar as they animated their creations was truly inspiring. This blend of visual art and AI technology not only enriched their artistic skills but also introduced them to the wonders of digital creativity.

IN ASSEMBLY

We are thrilled to share the wonderful moments from our recent Mother's Day Special Assembly, held in the library. It was a beautiful time to celebrate and honor the remarkable mothers who play such an invaluable role in our lives.

Our Grade 2 learners came together to cherish their mothers' love, strength, and unwavering support through music and dance. As we gathered, we shared heartfelt moments, reflections, and a beautiful Mother's Day quote that inspired us all.

KUDOS

THE WINNER

Huge congratulations to Punyashrvan Sharma, Reyansh Raheja, and Vedhansh Rastogi from Grade VI for their outstanding achievement at Kechnovation!
These brilliant minds topped the Brand Design sub-event, standing out among competitors from 20 other schools.

Punyashrvan Sharma from Grade 6A secured second prize at the Maharathi Rapid Chess Tournament 2024!
He competed against much older competitors in the Under 16 category.

KUDOS

Our six young debaters represented KWS at the 'Manthan' Inter-School Debate hosted by DPS Raj Nagar.

The competition, held in the Asian Parliamentary Debate format, saw our students deliver powerful arguments and showcase their oratory skills.

Special congratulations to our Master Orators:

Rayhan Shadab Khan (Grade 5)
Rayna Singh (Grade 5)
Tammairra Raj (Grade 7)

TEACHER'S CORNER

Making the Most of Kids' Vacation Time

Vacations offer a perfect blend of relaxation and opportunities for growth. To ensure kids enjoy their break while staying productive, balance is key.

Firstly, encourage them to explore hobbies. Whether it's painting, gardening, or playing musical instruments, these activities can be both fun and enriching. Secondly, reading should be a staple. Introduce them to books that align with their interests, sparking their imagination and improving their literacy skills.

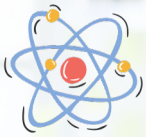

Engaging in educational games can be a delightful way to learn. Puzzles, board games, and online educational platforms can sharpen their cognitive abilities while providing entertainment.
Additionally, involve them in physical activities. Outdoor sports, biking, or even daily walks can promote physical health and foster a love for nature.
Involving kids in family activities, such as cooking or planning a small garden, teaches life skills and responsibility. Encourage them to set personal goals for the vacation, whether it's mastering a new skill or completing a project, fostering a sense of accomplishment.

Lastly, ensure there's ample time for unstructured play and relaxation. A balanced approach to vacation activities ensures that kids return to school refreshed and enriched, having enjoyed a mix of fun and productive experiences.

Wonders of Science

Exploring the wonders of science opens doors to boundless possibilities and profound understanding. From the microscopic intricacies of cellular structures to the vast expanses of the cosmos, science reveals the mysteries of our world and beyond.

Technological advancements, driven by scientific research, have revolutionized medicine, communication, and transportation, enhancing our quality of life.

Innovations such as artificial intelligence and quantum computing promise to further transform society, offering solutions to complex challenges.

By fostering curiosity and critical thinking, the exploration of science encourages a deeper appreciation for the natural world and empowers us to build a sustainable and knowledgeable future.

REFLECTIONS FROM PARENTS

The Power of Parent-Teacher Partnership in a Child's Overall Development

There are many good practices KWS follows, but the one close to my heart is Parent-teacher collaboration and I am the biggest promoter of this as it plays a crucial role in the holistic development of a child. When parents and teachers work together, they create a supportive environment that fosters academic success, emotional well-being, and social skills.

I want to take a moment to talk about some of the best practices which helped us with our child Vani's development because of our strong partnership with her Class Teachers and KWS Management in the last 3 years since she has been part of KWS:

1. Regular update and communication between home and school ensures that we as parents are aware of the child's progress and challenges. Together, we created consistent strategies, identified improvement opportunities to support kids learning and agreed on actions which we as parents need to take and how school can support us to achieve them.
2. Collaborative efforts lead us to identify personalized learning plans that address our child's unique needs.
3. A strong partnership between parents and teachers also contributes to our child's emotional and social growth. Children thrive when they feel supported both at home and at school.
4. When parents and teachers share similar values and expectations, children receive consistent messages about behaviour and attitudes, which helps them understand and internalize these concepts.
5. Teachers provided us insights into a child's social interactions and emotional state which enabled us to offer targeted support and guidance at home.
6. Joint efforts helped us to focus on developing problem-solving skills and encouraging children to tackle challenges both at home and in school.
7. Consistent expectations from both parents and teachers encourage children to take responsibility for their actions and learning.

Through open communication, shared goals, and mutual respect, this partnership can significantly enhance a child's overall development, preparing them for future success.
